

MOBIKO

"Let's shape the future of green corporate mobility" - We are MOBIKO a B2B Mobility as a Service (MaaS) Start-up from Munich. Driven by digitalisation, urbanization and they need for greater sustainability we are at a turning point when it comes ecological and economical responsibility. And as our Slogan says we are working on the future of sustainable mobility.

MOBIKO stands for Mobilitätskontingent, which is the German word for mobility budget. Enabling employers to provide a more flexible mobility solutions by providing the MOBIKO mobility budget is how we got started. But we are striving for more and continue to build the #1 corporate mobility platform for flexible, contemporary and more sustainable mobility. That's why we say LET US shape the future of green corporate mobility - we need you as a

Senior Full Stack Developer (m/f/d)

Cologne area | Remote | 40h | as of now

What is this position about?

Full Stack Developers are the swiss knife of every software company. They are responsible to implement business requirements without thinking "in boxes". One day, you are working on a difficult database trigger and the next day you could be writing CSS to make a button look beautiful. The always-changing challenges to improve the product and the customers value are what makes this position so interesting and exciting. The Full Stack Developer also advises on technologies and methodologies. This is why you can take your time at MOBIKO to test out new things and share your insights with the team.

Our current Tech Stack

At MOBIKO, we believe that technology can (and should) change over time. This is why we are not dogmatic about our technologies and use whatever is pragmatic, fast, and fitting to our use cases.

Our current Tech stack consists of

- VueJS for the Front-End and PWA
- NodeJS with NestJS on the Backend
- PostgreSQL as Database
- AWS and Azure with Docker and Kubernetes

And when we say Senior Full Stack Developer, we hope that:

- you are excited about learning new things, technologies and constant improvement
- you enjoy your work and have no problem to motivate yourself - especially if you are working from home
- you have a degree in in computer science or finished an apprenticeship (e.g. the german "Fachinformatiker für Anwendungsentwicklung") and have at least 3 years of experience
- you've seen quiet some stuff out there and have some ideas on how to do it better
- you like patterns, different programming styles (e.g. functional programming, aspect oriented programming etc.) and clean code
- you have no problem in hearing other points of view and are willing to take the time to understand other people's choices on what's the best approach to develop a certain feature
- you have good English skills and can use them constantly to work with our team 😊

If that is the case in return we will not only offer you a job but,

Work as you like

including remote or hybrid work and flexible working hours
